## FRONTEND DEVELOPER

I am a recent graduate in front-end development currently seeking opportunities in the job market to kickstart my career. As a developer, my focus is on creating user-friendly and responsive websites with an emphasis on providing excellent and straightforward user experiences. In my free time and during my studies, I have gained expertise in building websites using tools such as HTML, CSS, JavaScript, React, Bootstrap, and APIs. I am now eager to apply my skills and, most importantly, continue learning.

I am motivated and ready for new challenges.
